Argyranthemum

Argyranthemum Lollies

Marshmallow

This variety is naturally compact with a well-mounded, tidy habit, making it an excellent choice for both containers and landscapes. It features early blooming and strong branching, ensuring a vibrant display from the start of the season. Reaching a height and width of 30 to 36 cm, it fits perfectly in 12–15 cm pots and is ideal for garden beds. Additionally, its pollinator-friendly nature makes it a valuable addition to any eco-conscious planting.

Argyranthemum Grandaisy

Argyranthemum Aramis

Argyranthemum Aramis Double

Double white

Double Primrose

Double pink

The Argyranthemum 'Aramis Double & Single' is a compact, pollinator-friendly plant that attracts bees and butterflies all season long. Growing just 30–45 cm tall, it’s ideal for borders, containers, and small garden spaces.

It thrives in full sun, with moderate watering and well-drained soil. Low maintenance and long blooming, it only needs light deadheading to stay vibrant from spring to fall.

Pink

Red

Argyranthemum *Comet* is a compact daisy with bright red blooms that flower most of the year. Ideal for garden beds, rockeries, containers, and cottage gardens, it grows to 40 cm high and 40–50 cm wide. Thrives in full sun to part shade and benefits from light pruning after flowering. Supplied as a 48mm advanced plug.

Argyranthemum Sassy

Double yellow

Pink

Double deep rose

Red

Argyranthemum 'Sassy' adds bold, vibrant colour with its bright daisy-like blooms. Compact and easy to grow, it reaches 30–45 cm tall perfect for containers or borders.

It loves full sun, needs moderate water, and thrives in well-drained soil. Pollinator-friendly and long-blooming from spring to fall, with minimal care.

Madeira crested

Hot pink

Merlot

Madeira Crested is a compact *Argyranthemum* growing 30–40 cm tall and 30–35 cm wide, with a neat, bushy habit. It features bright yellow, semi-double to crested flowers around 4–6 cm wide, blooming from early spring through summer. Ideal for borders, pots, or baskets, it thrives in full sun, well-drained soil, and attracts bees and butterflies. Regular deadheading encourages more blooms, and it performs well in warm, mild climates.
